

The 4 Yard Skip

This is our smallest size skip and is suitable for general domestic use, such as kitchen upgrades and bathroom refits. It is also frequently used for garden/landscaping projects and for builders' and household waste.

Capacity: 3 cubic metres (approximately 45 bin bags). Length: 1.83 metres. Width: 1.29 metres. Height: 0.97 metres.

The 6 Yard Skip

This is a medium size skip and is suitable for larger domestic use, such as major kitchen upgrades and more extensive bathroom refits. It may also be used for garden clearances and remodelling projects and general waste.

Capacity: 4.6 cubic metres (approximately 60 bin bags). Length: 2.6 metres. Width: 1.5 metres. Height: 1.2 metres.

The 8 Yard Skip

This is a larger size skip and is suitable for projects producing bulky waste such as soil, concrete and general builders waste. Used for various industrial and commercial purposes.

Capacity: 6.1 cubic metres (approximately 80 bin bags). Length: 3.66 metres. Width: 1.68 metres. Height: 1.22 metres

The 12 Yard Skip

This is a large size skip and is suitable for projects producing large amounts of light bulky waste such as plastics and packaging popular on manufacturing and building projects.

Capacity: 10.2 cubic metres (approximately 120 bin bags). Length: 3.7 metres. Width: 1.78 metres. Height: 1.68 metres

The 14 Yard Skip

Currently, our largest skips are 14-yards which makes them most suitable for commercial projects where substantial bulky waste is to be removed.

Capacity: 10.7 cubic metres (approximately 140 bin bags). Length: 4.1 metres. Width: 1.98 metres. Height: 1.98 metres.
